

WE ARE REVEALING THE SECRETS OF THE WATER
and increasing your revenue

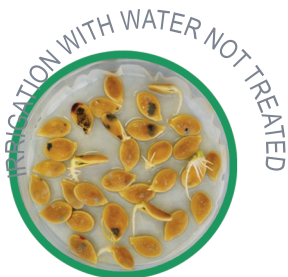

Swiss tech
Green Line
For lawn and garden

Reverse turbulence in IPS device increases the water energy and its positive features:

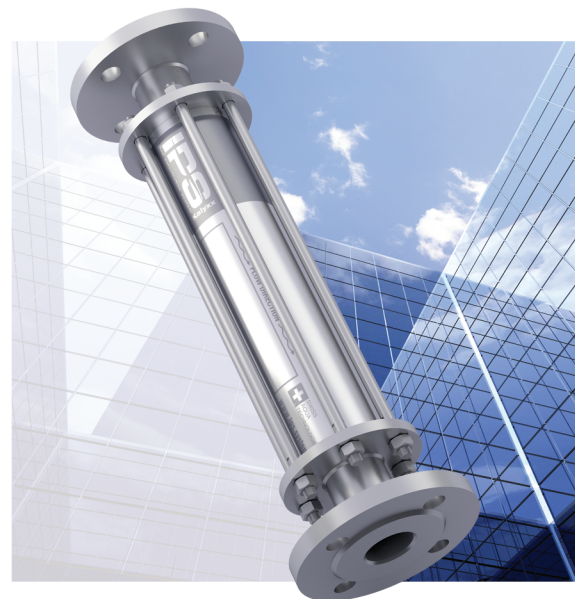

- It accelerates transportation of nutrients and oxygen into the cell
- increases and accelerates germination of plants
- high capillarity (water transfer) into the capillaries brings higher crop

Research conducted at the Agricultural University of Nitra

WE ARE REVEALING THE SECRETS OF THE WATER
and protect your business

IPS INDUSTRY
For Industrial use

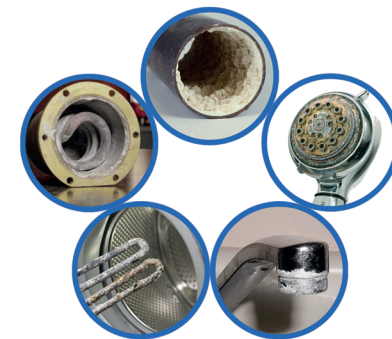

Ion polarization system is suitable for facilities which uses flowing water. Production and processing plants, washing lines, restaurants, hotels, laundry, barber shops, dry cleaners, breweries, swimming pools...

It also works reliably at heat transfer stations, in the protection of heat exchangers, water systems, boilers and refrigeration plants.

Reduces downtime, service, cleaning, and premature replacement of components and entire devices.

Hard Water and Limescale.

Minerals and salts (calcium, magnesium) contained in the water causing the hardness and the problems of formation of solid deposits in the hot-water pipe systems, boilers, cooling systems, the water taps, shower heads etc. This causes a reduction in pipe diameter and a deterioration of heat transfer. There is an increase in energy loss and shortening the life of the equipment. IPS does not take minerals from the water which are important for the body, but changes the structure of calcium carbonate CaCO_3 from hard calcite to soft aragonite to prevent scaling and corrosion.

Benefits of the IPS device

- Physical – galvanic water treatment
- Without external power source
- Without maintenance
- Without operating costs
- Without chemistry

Technical specifications:

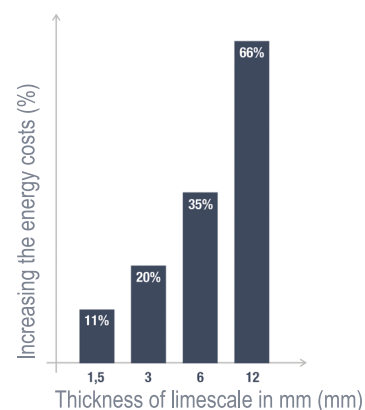

Type	Attachment	Width (mm)	Length (mm)	Weight (kg)	Max. flow rate (m³/h)

WE ARE REVEALING THE SECRETS OF THE WATER and saving your money

Swiss tech *Red Line* for Boiler

How much money we will save you?
(ROI is 9 months)

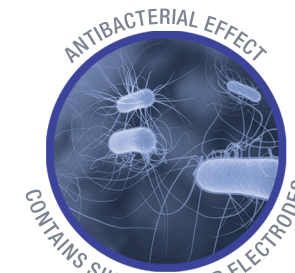

Do not pay for energy more than you need. Limescale conducts heat up 300 times worse than any metallic heating coil. Protect your pipelines and boiler so it can serve to you as long as possible. The return of your investment is 9 months.

**Turbulent galvanic polarization
TGP® - patented technology**

WE ARE REVEALING THE SECRETS OF THE WATER and supports your health

Swiss tech *Blue Line* For Drinking water

Benefits of Ionized water:

- Suitable for long-term drinking
- Better taste and longer freshness
- Improves metabolism
- It balances the pH of the body and prevents the emergence of diseases
- It helps digestion of the intestines
